PROFILE

Software engineer with 3+ years' experience across full-stack and backend development: .NET microservices, real-time platforms and machine-learning applications. I hold a First-Class Honours BSc in Software Engineering, design production-grade systems with Clean Architecture, event-driven microservices and secure APIs, ship them cloud-native on Azure, and pick up new technologies quickly.

SKILLS

Languages: C#, TypeScript, JavaScript, Java, Python, PHP, SQL

Frameworks: ASP.NET Core, EF Core, .NET Aspire, Blazor, SignalR, Spring Boot, Hibernate, React, Next.js, Node.js, Express, Fastify, Tailwind CSS, TensorFlow

Architecture: Microservices, Clean Architecture, DDD, CQRS, event-driven systems, REST APIs, WebSockets/SignalR, CI/CD, Agile, TDD

Data & messaging: SQL Server, PostgreSQL, MongoDB, MySQL, Redis, RabbitMQ / MassTransit, Hangfire

Cloud & DevOps: Azure (Container Apps, App Service, Service Bus, APIM, Blob, SignalR), Docker, GitHub Actions, Azure DevOps, Bicep, Dokploy, DigitalOcean, OpenTelemetry, Serilog

Tools: Git, Postman, Jira

Soft skills: Problem-solving, technical communication, teamwork, time management

EXPERIENCE

Software Engineer · Techwire Lanka (Pvt) Ltd — Aug 2024 – Present

Platforms for clients including 747 Live.

- Lead engineer on a high-scale social engagement and real-time content platform (.NET 10, Aspire): feeds, stories, real-time chat and live streaming, built for high-frequency fan-out with CQRS, Redis caching and event-driven messaging.
- Core engineer on a multi-tenant agent-network and commission platform (.NET 9, Aspire): a 10-level hierarchy, an automated commission engine and a central identity and permission hub for peer microservices.
- Contributing engineer on a multi-currency wallet and double-entry ledger with exactly-once idempotency, HMAC-signed partner APIs and Serializable transactions for financial correctness.
- Built supporting services and tooling: a real-time event-data and settlement platform, a multi-tenant crypto and payment gateway, and a reusable .NET 10 API template adopted across the team.
- Delivered on Azure (Container Apps, Service Bus, APIM, Blob) with Bicep and Azure DevOps / GitHub Actions pipelines; observability with Serilog, OpenTelemetry and Sentry.

Associate Software Engineer · Techwire Lanka (Pvt) Ltd — Dec 2023 – Aug 2024

- Built an inventory management web application for CEB's Lakvijaya Power Plant with ASP.NET Core and EF Core.
- Built a hospital management web application for Kumudu Hospital with ASP.NET Core and EF Core, deployed on Microsoft Azure.

Software Engineer Intern (R&D) · EXE.lk — Nov 2022 – May 2023

- Developed machine-learning-based web and mobile applications with ASP.NET Framework, TensorFlow, MediaPipe and MySQL.
- Worked across backend and frontend on products built from scratch, including several dashboards.

SELECTED PROJECTS

Real-time content platform — Lead engineer · ~90% of 480+ commits

Feeds, 24-hour stories, real-time chat and live streaming on .NET 10 and Aspire, built for high-frequency fan-out. ASP.NET Core, Aspire, EF Core, PostgreSQL, Redis, RabbitMQ, Azure DevOps

Agent network & commission engine — Core engineer

A multi-tenant platform with a 10-level agent hierarchy, an automated commission engine and a central identity hub for peer services. .NET 9, Aspire, PostgreSQL, Service Bus, Container Apps, Bicep, APIM

Multi-currency wallet & double-entry ledger — Contributing engineer

Every deposit, transfer, FX conversion and withdrawal lands in an immutable double-entry ledger. Clean Architecture, EF Core, PostgreSQL, Redis, Aspire, Container Apps

Real-time event data & settlement platform — Lead backend engineer

Ingests live event data from a third-party feed and moves money through an external wallet provider, with an automated settlement engine. ASP.NET Core 9, PostgreSQL, Next.js, GitHub Actions, Dokploy

.NET 10 API platform template — Sole author

A dotnet new template that scaffolds a production-ready Web API in one command, used across the team. .NET 10, EF Core 10, PostgreSQL, Redis, Aspire, OpenTelemetry

ResilienceOS — Personal project

A climate-resilience platform of six event-driven .NET 10 services on Aspire: weather ingestion, ML.NET risk predictions and real-time alerts. .NET 10, Aspire, ML.NET, Service Bus, TimescaleDB, Kubernetes

Musify — Final-year project

Finds musical notes and chords in an uploaded song using FFT and a Bi-LSTM-CRF model. Python, TensorFlow, Next.js, Node.js, MongoDB

ADDITIONAL PROJECTS

- **Multi-tenant crypto wallet & payment gateway** (.NET 9, Tatum.io, AES-256-GCM)
- **PayHere multi-tenant payment gateway** (.NET 9, Minimal APIs, PayHere)
- **Horoscope consultation marketplace** (.NET 9, Next.js 16, Clean Architecture)
- **Real-time multiplayer games platform** (TypeScript, Fastify, WebSocket, React)
- **Couples lifestyle app backend** (.NET 10, Aspire, Stripe, Redis)
- **Z-DUMP V2.0** (ASP.NET Core 8, React, SQL Server)
- **Inventory management system** (ASP.NET Core 8, EF Core, SQL Server)
- **Hospital management system** (ASP.NET Core, EF Core, Azure)
- **RESPER restaurant management & POS** (Spring Boot, MySQL, React)

OPEN SOURCE & VOLUNTEERING

- **frag-arena** (14 merged PRs): Browser-based 3D multiplayer FPS: server-side lag compensation, session-token reconnection, server-verified headshots, per-IP WebSocket rate limiting and spatial audio.
- **Dokploy** (PRs submitted): Fixes submitted upstream for database backups, Traefik certificates and session expiry.
- **Council Member & Technical Team Lead, FOSS Community, NSBM Green University** (Mar 2022 – Feb 2024): Led the technical team on open-source projects and event websites with React, Node.js, Next.js, TypeScript, Python, MongoDB and DigitalOcean.

EDUCATION

BSc (Hons) Software Engineering, First Class — Jun 2021 – Jun 2024

University of Plymouth, UK · Studied at NSBM Green University

G.C.E. Advanced Level — Jan 2018 – Dec 2020

Central College, Piliyandala · Physical Science stream
